

Asiatic journal of Biotechnology Resources is an international, peer-reviewed journal publishing original research and reviews on basic and applied aspects of biotechnology innovations and updates.

Submission of Manuscripts

Authors are requested to submit their manuscripts electronically, by attaching document to email and send it to submit@pacificjournals.com or pacificjournals@gmail.com. The submission will be acknowledged within 24 hr of submission of article with unique identity number, which can be use for all future correspondence.

A cover letter must be submitted by authors together with the manuscript.

The cover letter must address the following points.

- 1) all authors agree to submit the work to Biotechnology Resources
- 2) the work has not been published/submitted or being submitted to another journal
- 3) the novelty and significant contribution of the submitted work must be briefly described
- 4) the transfer of copyright from the author to the publisher.
- 5) suggestions for reviewers. (If any)

The primary criteria for judging the acceptability of a manuscript are its scientific and biotechnological significance and its novelty. Upon receipt, submissions are initially screened by the Editors and the Advisory Board, and manuscripts lacking in these respects will be declined, even if the experimental work appears to be technically sound. After initial screening, all submissions are reviewed by referees whose names are not normally disclosed to authors. On acceptance for publication papers are subject to editorial amendment.

Authors are suggested to provide the names, addresses, phone numbers and e-mail addresses of up to six potential reviewers. It is not appropriate to nominate individuals that have had any input into the manuscripts submitted or any recent collaboration with the authors. The Editors may or may not take these suggestions into account during the reviewing process.

Format and type of manuscripts

Contributions are classified as Research Highlights, Global News, Regular Articles, Short Communications, and Mini Reviews

Research Highlights: Researchers among universities submit their work highlights in the form of stepwise conclusive results.

Global News: Authors can communicate global or local innovation with this news. News must not cross 200 words limit.

Regular Articles: The full length research paper must describe and interpret the complete work. Research Papers should be a record of significant, original research and should not normally exceed 6000 words in length. Experimental procedure should be given in details for reviewing the work.

Short Communications: A short Communication is suitable for giving results of minor research projects, small investigation projects, developed techniques, innovative methods, etc.,

Mini Reviews: Authors should send a brief outline, the authors are also requested to send their interest to editor before the manuscript drafted with covering letter. Submissions not conforming to these guidelines may be returned to the authors.

Asiatic J Biotech Res.

(AJOB) ISSN 0976-4992

Issues Per Year : 4+1Spl.

Global Knowledge Partner

abbreviations (such as ATP and DNA) need not be defined. Use the same abbreviations as the Asiatic Journal of Biotechnological Resources.

The Introduction should provide a clear statement of the problem, the relevant literature on the subject, and the proposed approach or solution. It should be understandable to colleagues from a broad range of scientific disciplines.

Materials and methods should be complete enough to allow experiments to be reproduced. However, only truly new procedures should be described in detail; previously published procedures should be cited, and important modifications of published procedures should be mentioned briefly. Capitalize trade names and include the manufacturer's name and address. Subheadings should be used. Methods in general use need not be described in detail.

Results should be presented with clarity and precision. The results should be written in the past tense when describing findings in the authors' experiments. Previously published findings should be written in the present tense. Results should be explained, but largely without referring to the literature. Discussion, speculation detailed interpretation of data should not be included in the Results but should be put into the Discussion section.

The Discussion should interpret the findings in view of the results obtained in this and in past studies on this topic. State the conclusions in a few sentences at the end of the paper. The Results and Discussion sections can include subheadings, and when appropriate, both sections can be combined.

The Acknowledgments of people, grants, funds, etc should be brief.

Tables

Tables should be submitted on separate sheets together with a suitable caption at the top of each table. Column headings should be kept as brief as possible, and units of measure indicated in parentheses. Footnotes to tables should be placed at the bottom of the table to which they refer.

Figure captions should be typed in numerical order on a separate sheet. Graphics should be prepared using applications capable of generating high resolution GIF, TIFF, JPEG file as email attachment.

References

Number all references to the literature in a single sequence in the order in which they appear in the text, using Arabic numerals. Full citation should be given for all authors. Titles of articles, as well as titles of chapters in books, should be included. Abbreviate journal titles in accordance with

Bibliographic Guide for Editors and Authors (Asiatic Journal of Biotechnology Resources). References should take the following form:

1. Rijken DC, Hoylaerts J, Collen D. (1982). Fibrinolytic properties of one-chain and two-chain human extrinsic (tissuetype) plasminogen activator. *J Biol Chem*;257:2920-2925.
2. Thomas K, Gimenez-Gallego G, DiSalvo J, Linemeyer D, Kelly L, Menke J, Mellin T, Gusch R. (1987). Structure and activities of acidic fibroblast growth factor. In: *Angiogenesis Mechanisms and Pathobiology* Cold Spring Harbor Laboratory, Cold Spring Harbor, NY, 9-12

Indicate references by number(s) in square brackets in line with the text. The actual authors can be referred to, but the reference number(s) must always be given.

List: Number the references (numbers in square brackets) in the list in the order in which they appear in the text.

Examples:

Reference to a journal publication:

[1] Van der Geer J, Hanraads JAJ, Lupton RA. (2000). The art of writing a scientific article. *J Sci Commun*;163:51-9.

Reference to a book:

[2] Strunk Jr W, White EB. *The elements of style*. 3rd ed. New York: Macmillan; 1979.

Reference to a chapter in an edited book:

[3] Mettam GR, Adams LB. (1999). How to prepare an electronic version of your article. In: Jones BS, Smith RZ, editors. *Introduction to the electronic age*, New York: E-Publishing Inc;p. 281-304

Proofs

One set of page proofs in PDF format will be sent by e-mail to the corresponding Author (if we do not have an e-mail address then paper proofs will be sent by post).

Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. We will do everything possible to get your article published quickly and accurately. Therefore, it is important to ensure that all of your corrections are sent back to us in one communication: please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. Proof reading is solely authors responsibility. Note that AJOBRR may proceed with the publication of your article if no response is received. On acceptance of manuscript, author will receive conformation mail and nominal processing fees information.

Reprints

The corresponding author at no cost will be provided with a PDF file of the article via e-mail or, alternatively, free paper offprints. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use. Additional paper offprints can be ordered by the authors. An order form with prices will be sent to the corresponding author. The abstract of accepted papers will be published on website for global reference.

The certificate of publication will be issued to the first author of the journal.
